INFORMATION REQUIRED FOR THE DETERMINATION OF A HEAT EXCHANGER

FIRM :

APPLICATION :			
	Units	« HOT » Fluid	« COLD » Fluid
Exchanged power *	W, kcal/h, ch		
Reserve of surface (if necessary)	%		
Fluid nature			
Fluid characteristics Physical properties – compatibility materials			
Viscosity (for oil)	cSt, mm ² /s		
Flow (in the heat exchanger)	l/h, l/mn, m3/h		
Inlet temperature *	°C		
Outlet temperature *	°C		
Operating pressure	bar, kPa, mCE		
Pressure loss maxi acceptable	bar, kPa, mCE		
Available dimension	mm		
Complementary precise details			

*** For thermal dimensioning, collect the following data at least :**

- power, flows, outlet temperatures
(the « COLD » fluid flow can be determinate by us)
- flows, outlet and inlet temperatures
(the flow and the outlet temperature of « COLD » fluid can be determinate by us)

General notes
